

Robert Siński

Fullstack developer

Katowice, Poland robert.sinski@outlook.com robertsinski.dev github.com/Biplo12 linkedin.com/in/robert-siński

Four years of building web apps, mostly in TypeScript. Backend and frontend, usually both on the same project.

EXPERIENCE

Hurtopony

1 yr 5 mos

● Frontend Web Developer

Apr 2025 to now

I work on the frontend of the company store and the panels the team uses internally. New pages and features, plus fixes to the parts that were built before I joined.

Gravity Rifiers

1 yr 8 mos

● Web Developer

Jan 2025 to Aug 2026

Built the site for the game and its wiki, internal tools for the team, and set up the server it runs on.

Anfata Games

2 yrs 8 mos

● Full Stack Engineer

Feb 2024 to Apr 2025

Worked across the company sites and apps. New features, serverless functions on Firestore and Parse, and the frontend side of smart contract calls.

● Junior Full-stack Developer

Sep 2022 to Aug 2023

Started with smaller features on the sites and apps, then moved to writing Node and Python scripts that took over jobs people had been doing by hand.

Fundacja Polskie Maki

contract

6 mos

● Full-stack Developer

Oct 2023 to Mar 2024

Two browser games for the foundation. Players join a session without an account, the way Kahoot works, and the quizzes use the map and where the player is.

PROJECTS

Klaps

site · github

A site that shows where and when older films are playing in Polish cinemas. Six services: the site, an API, a collector, a social bot, an admin panel and a mailer. Descriptions come from Gemini, with the wording variant picked in code so they do not all read the same.

BoardFlow

site · github

A whiteboard people draw on together. Shapes, notes and images, with everyone's changes showing up as they happen. Realtime state lives in a Liveblocks room, accounts and boards in Convex.

orderflow-engine

github

Order processing built so a failure in one step does not lose the order. Queues, retries on their own, and an event log.

SKILLS

Languages TypeScript, JavaScript, Python, SQL

Data PostgreSQL, MySQL, Redis, Drizzle, BullMQ

Frontend React, Next.js, Tailwind

Tooling Docker, GitHub Actions, Git, Jest

Backend NestJS, Fastify, Node, Bun

EDUCATION

Zespół Szkół Technicznych w Bytomiu

2018 to 2022

IT technician

Programming, databases and networking.
