

Robert Siński

Fullstack developer

Katowice, Poland robert.sinski@outlook.com robertsinski.dev github.com/Biplo12 linkedin.com/in/robert-siński

Four years of building web apps, mostly in TypeScript. I work on the backend and the frontend, and on most projects I end up doing both.

EXPERIENCE

Hurtopony

1 yr 5 mos

- Frontend Web Developer Apr 2025 to now
- I work on the frontend of the company store and the panels the team uses internally. New pages and features, plus fixes to the parts that were built before I joined.

Anfata Games

2 yrs 8 mos

- Full Stack Engineer Feb 2024 to Apr 2025
- Worked across the company sites and apps. New features, serverless functions on Firestore and Parse, and the frontend side of smart contract calls.
- Junior Full-stack Developer Sep 2022 to Aug 2023
- Started with smaller features on the sites and apps, then moved to writing Node and Python scripts that took over jobs people had been doing by hand.

Fundacja Polskie Maki

contract

6 mos

- Full-stack Developer Oct 2023 to Mar 2024
- Two browser games for the foundation. Players join a session without making an account, the way Kahoot works, and the quizzes use the map and where the player is. Leaderboards and a summary at the end.

PROJECTS

Klaps

site · github

A site that shows where and when older films are playing in Polish cinemas. Four services behind it: the site, an API, a job that collects screenings and fills in film data, and a bot that posts what is coming up to social media. Descriptions come from Gemini, but the wording variant is picked in code so they do not all read the same.

BoardFlow

site · github

A whiteboard people draw on together. Shapes, notes and images, with everyone's changes showing up as they happen, and boards you can invite people to.

orderflow-engine

github

Order processing built so a failure in one step does not lose the order. Work moves through queues, failed jobs retry on their own, and every state change lands in an event log.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL	Data	PostgreSQL, MySQL, Redis, Drizzle, BullMQ
Frontend	React, Next.js, Tailwind	Tooling	Docker, GitHub Actions, Git, Jest
Backend	NestJS, Fastify, Node, Bun		

EDUCATION

Zespół Szkół Technicznych w Bytomiu

2018 to 2022

IT technician

Programming, databases and networking, plus the first websites I ever put online.
